SAILMAN BATTEN SYSTEM

Sailman batten boxes are easy to attach to a sail and connect to the mast slide using a unique quick release system that makes removing the sail from the mast an easy, single handed operation. The box rotates and lays flat on the boom when the sail is lowered. A range of batten covers accommodate most types of battens. when used in conjunction with Sailman or other 30mm wide battens, full tension adjustment is also provided. In most cases the batten tensioner sits on top of the batten pocket where it is well reinforced. Solid screw and backplate connection to sail Interchangeable covers allow use of round, flat and Sailman battens. Fibre stabilised, high grade materials with low friction PTFE impregnated slugs and body. All slugs feature stainless steel inserts for increased strength. Low friction dimpled wear pads distribute compression loads to the aft face of mast. Fully articulating, stainless steel joints. Cast stainless steel arm for quick release connection to the batten box.

SAILMAN 4000

Sailman 4000 slides are well engineered efficient non moving part slides that are ultimately tough and reliable. Ideal for spars where the Rutgerson slide is not compatible or extreme tough sailing especially in cold or salt environments and reliability is paramount over friction we recommend Sailman 4000 for boats up to 43ft.

SAILMAN 3500

Sailman 3500 slides are recommend for composite spars where an external track is not desired, or for alloy spars where the track gate stand proud of the mast or wing masts. Suitable for boats up to 35ft only.

SAILMAN 3000

Sailman 3000 slides are the most reliable budget small boat batten slides available on the market, they are designed for boats up to a maximum of 35ft but can be used as intermediate slides to be compatible with any of the other trackless systems.
